

Professional Experience

Total Experience: 36 Months

- **Senior Developer @ Relay Innovation Solutions:** SharePoint 2007 Developer, jQuery Developer – Sep'09 – Dec'09 (3 Months)
- **Associate @ Sapien:** SharePoint 2007/WSS 3.0 Developer Silverlight Developer, Javascript/jQuery Developer, ASP.NET Web Application Developer, Web Designer – Nov'06 – Sep'09 (33 Months)

Academics

- **Bachelor of Engineering in Information Science** from **R.N.S Institute of Technology (VTU)**, Bangalore. Aggregate Percentage: 70%
- **Class 12 (Pre-University Certificate)** from **Sri Kumarans Children Home**, Bangalore. Aggregate percentage: 75%
- **Class 10 (CBSE)** from **Central School, Malleshwaram**, Bangalore. Aggregate percentage: 72%

Computer Skills

- Programming Languages – C# 3.0, JavaScript, jQuery
- SharePoint 2007 Development – Controls, Web Parts, Deployment
- ASP.NET 3.5 Web Application Developer
- Web Designer – X/D/HTML, CSS 2.0
- Intermediate Silverlight 2.0 Developer
- Exposure on WPF, WF, WCF, LINQ
- Special experience of integrating SharePoint and Silverlight
- Concrete foundations in C/C++, Data Structures, Algorithms, Graphics and OSs
- Proficient in Adobe Photoshop and related graphics design tools.

Projects

- **Enterprise Transformational Platform**
A SharePoint implementation with extensive customization of features for enterprises to manage their knowledge and ideas better.
Roles and Responsibilities:
Product built by Relay Innovation Solutions, which is a UK based startup with about 10 employees. Part of the continuous design, implementation and testing team of 4 headed by our CTO who has vast experience in the domain.
 - Was responsible for building many jQuery AJAX controls and web parts.
Ex.: Alert and Notification Flasher, Tag Cloud for Popular Search Keywords, People Picker Control with AutoPopulate feature, jQuery based Chat for SharePoint, jQuery based Gantt Chart Component etc.
- **SharePoint Center Of Excellence Projects**
 - **Intranet In A Box:** Built a custom SharePoint 2007 intranet portal with advanced features and inbuilt components.
Roles And Responsibilities (Team of 4 including one Visual Designer)
 - Built custom components/web parts such as Silverlight SlideShows, Custom Calendars, jQuery/Ajax Tabbed Feed Viewer Controls – all built as individual components which are end user extensible, configurable and ready to be deployed using features and solutions.
 - SharePoint Deployment – Was in charge of building features for all components developed by the team and to package it into the installer including Lists, Site Definitions, FeatureReceivers, Event Handlers etc.
 - Build and integrate custom workflows such as Task Assignment, Leave Approval etc
- **Team Portal:** A SharePoint 2007 Collaboration portal for a large globally distributed team to share documents, participate in discussions, resource/personnel and time tracking applications and more

related features. I was the "One man team", reporting directly to a client from the requirement gathering stage to technology evaluation to design, develop and deliver the entire portal. Project was implemented using Sapient's tailored Agile methodology in multiple iterations with constant changing needs and ideas.

- **Xpress:** An online real time trade floor application built extensively on AJAX and ASP.NET to enable users to trade in various client listed products. Xpress has won the Energy Star Innovation of the Year 2006 award. Project role: Part of a 3 member team - responsible for requirements gathering, design, development, client interactions and enhancements support. Played the role of Track Lead for 3 months.
- **Energy Manager:** A visual graph and mapping web application to allow traders to mix and mash various tradable products and analyze and acquire best value deals on them. Built on top of the Web Service Behaviors component using asynchronous SOAP calls, ASP.NET and C#. Part of a three member team to design and develop the product which generates the XML data as requested, which is rendered by a 3rd party flash charts utility. Also part of the 2 member creative design team which designed the website's look and feel.
- **SLAAT:** Service Level Agreement Analysis Tool. Developed for Sapient, is a tool providing tracking of Incidents and Reports with alerting facilities. Built on the SQL Server Report Server and using the Integration Services of SQL Server 2005. The tool is currently being used to settle business critical deals and client payments. Part of the 3 member team to gather requirements, design and develop and also responsible for future enhancement requests.

Additional Skills | Abilities | Activities | Recognitions | Certifications

- **MCTS** - Office SharePoint Server 2007: Application Development
- **MCTS** - Office SharePoint Server 2007: Configuration
- **MCTS** - Microsoft .NET Framework - Application Development Foundation (**70-536**)
- Nominated as Microsoft Student Ambassador – Microsoft® Academic Developer Program.
- Managed the .NET Special Interest Group (SIG) in Sapient Bangalore where we have weekly learning lunches, monthly .NET project updates, Tech Days and Product Launches.
- Conducted sessions on topics like C#.NET, SharePoint, jQuery, ASP.NET, SilverLight and XAML, XML Web Services etc. to both professional and student audiences.
- Demonstrated excellent people management skills, marketing and advertising abilities and event organization skills while being the Administrator of RNSITDOTNET
- Displayed good leadership and responsibility handling skills being the track lead for Xpress project in Sapient. Involved interacting with clients, tracking and delegation of tasks etc.
- Follow Nature and Wildlife photography as a serious hobby.
- Love outdoor adventure activities - Trekking, Rock Climbing, Rappelling etc.
- Participate regularly in Technology Community Activities and Competitions
- Have demonstrated good marketing and team building skills in all my endeavors – in the BDotNETStudent community, my current occupation, during college and more. I was the manager of College Clubs for BDotNETStudent and helped instantiate over 12 college .NET clubs across Bangalore and foster knowledge sharing as a community initiative.
- Have an ever expanding network of friends and partners with similar or varied interests. Easily develop a rapport with most people I interact with. My communication abilities and open minded, straight forward attitude are contributing factors. This has been a boon to strengthen client relations in all my projects.

Sports and Hobbies
